

# BUFFER TANKS AND D.H.W. TANKS

MADE OF HIGH-QUALITY  
STAINLESS STEEL

**TANKS PERFECT FOR HEAT PUMPS**  
ENSURING MAXIMUM USER COMFORT

## BUFFER TANKS

### COMFORT

- powder-coated casing
- high thermal water accumulation
- various capacities: 100 l, 200 l, 300 l

### ECONOMY

- profiled outputs from connection stubs
- very good thermal insulation
- up to 8 years of warranty

### OTHER

- built-in temperature sensor pockets
- built-in magnesium or titanium anode
- tank made of stainless steel SUS304 / DUPLEX
- freestanding tank
- electric heating element outlet

## SINGLE- AND DOUBLE-COIL D.H.W. TANKS

### COMFORT

- powder-coated casing
- high thermal water accumulation
- large coil surface area from 3.3 m<sup>2</sup> to 3.9 m<sup>2</sup>
- various capacities for single-coil tanks: 200 l, 250 l, 300 l
- various capacities for double-coil tanks: 250 l, 300 l

### ECONOMY

- profiled outputs from connection stubs
- very good thermal insulation
- up to 8 years of warranty

### OTHER

- two independent coils 2 m<sup>2</sup>/3.9 m<sup>2</sup>
- tanks made of DUPLEX stainless steel
- built-in temperature sensor pockets
- built-in magnesium or titanium anode
- freestanding tank
- electric heating element outlet

## COMBINED TANKS

### COMFORT

- powder-coated casing
- dual-functionality - 60 l buffer + 200 l D.H.W.
- high thermal water accumulation
- minimal space required for installation

### ECONOMY

- profiled outputs from connection stubs
- very good thermal insulation
- up to 8 years of warranty

### OTHER

- built-in temperature sensor pockets for both tanks
- built-in magnesium or titanium anode
- tank made of high-quality DUPLEX stainless steel
- freestanding tank
- outlet for electric heating element
